RE: Stipulation UMC 817.121-.126-(1)-DWD

Dear Ms. Linner:

In reference to the above stated stipulation, please insert the enclosed page 12-13a into the current Genwal Coal Company approved mining plan.

Should you have any questions or need additional information, please feel free to contact me.

Sincerely,

GENWAL COAL COMPANY

Allen P. Childs Mine Manager

- 3. The date of monitoring.
- 4. The vertical and horizontal positions of all monitoring points surveyed during that year.

A visual subsidence/escarpment failure survey will be conducted at quarterly intervals at areas where mining has taken place beneath escarpment areas visible from Huntington and Crandall Canyon for a period of two years after development mining.

During recovery mining (pillaring) under the escarpment, visual subsidence/escarpment surveys will be conducted at weekly intervals.

The subsidence/escarpment survey results will be recorded and submitted to the appropriate regulatory authority no more than 30 days following the subsidence/escarpment survey.

In the event that escarpment failures occur above pillar recovery areas, the operator shall immediately cease pillar recovery under escarpment and notify the Regulatory Authority. Pillar recovery operations in the escarpment areas may not resume until specifically approved by the Regulatory Authority with the consent of the BLM and Forest Service.
